JOB OPENING: Web Design & Front-End Developer

We have an immediate opening for either a part-time or full-time web designer with (preferably) front-end development experience. The primary responsibilities of this position include:

- Design complete web properties in Photoshop (or potentially other tools) based on discussions with client.
- Provide final designs to development team, along with associated stylistic and implementation guidelines for internal consumption and client usage.
- Help convert some aspects of the design into WordPress templates. While the development team will handle the bulk of the implementation, it's advantageous to have overlap in this area.
- Act as a liaison between development team and clients for design and implementation variations.
- Act as the final quality control prior to providing each completed project to the client - you'll ensure the design is implemented as envisioned.

The skills required for this position are as follows:

- Familiarity with WordPress, ideally having experience running your own WordPress website.
- Experience creating or working with WordPress themes and plugins.
- Be reasonably proficient in CSS, HTML, JS, PHP and also understand responsive design principles.
- Have extensive experience with Photoshop, Illustrator & Indesign.
- Have experience designing websites, brochures, logos, etc. Please provide links to your portfolio, or any online projects you've participated in.

This is a remote position (i.e. work from home or coffee shops), but candidates will be expected to meet in person at least once a week in the Chilliwack area.

Please submit a resume, along with a few paragraphs describing why you'd like the position, to jobs@lindelmedia.com. Also please include salary or compensation expectations. Only local candidates will be considered - please no agencies or outsourcing firms.
